

**Detailed Funding Mechanism for PIs at CUNY Colleges**

The ASRC Sensor CAT provides matching funds for Principal Investigators at CUNY Colleges who are working on New York State Industry-Sponsored research projects.

The flow chart below illustrates how funds from New York State Company (green boxes) can be used to sponsor a research project with a CUNY College PI using *Company Cash*. The ASRC Sensor CAT will match 10-50% of the *Company Cash* towards the sponsored research project (purple boxes). The % of *Matching Funds* will be determined by the Project Allocation Board based on company size (typically 50% for <100 employees, 10% for >100) and anticipated value, level of risk, and time to achieve economic impact.

Funds from *Company Cash* and *Matching Funds* will be transferred to two separate accounts managed by CUNY’s Research Foundation (RF). The RF account which holds the *Company Cash* must be designated to a CUNY College PI (dark blue box). The RF account which holds the *Matching Funds* will also be assigned to the CUNY College PI (light blue box). The CUNY College PI will use both RF accounts to pay for costs associated with the sponsored research project (yellow boxes).
